NOTES

PRESIDENT'S WELCOME

For our 36th Annual Winter Clinic, Dr. William McKenzie and his Committee has assembled an outstanding group of clinicians. All aspects of dentistry will be covered, so there is something for all.

I urge you to attend with all members of your staff. Both the Dental Nurses and Hygienist Societies have excellent programmes.

Support our exhibitors. For your convenience we have extended the exhibiting hours. Please consult your programme for the exact time.

Every year the Winter Clinic is one of the top clinics in North America. It is only through your attendance that we can maintain our high standards.

Bernard N. Crystal, D.D.S., B.A.

THE ONTARIO DENTAL HYGIENISTS' ASSOCIATION

Registration Fee \$10.00

Room: Library

Luncheon included

Come and learn about recent developments directly affecting the Dental Hygiene profession. Hear the advancements our own Adhoc committee has made regarding the Health Disciplines Act relating to Dental Hygiene.

Come and hear two members of our own association, None Yanke and Sherita Clarke, present the paper they have prepared, “The difference between Licensure and Certification” for the International Symposium in Amsterdam.

Would you know how to handle an emergency in the Dental office? Attend this program and learn.

You will receive details and pre-registration form in the mail. This program is presented for the benefit of all Hygienists. We hope you will support us.

HONORARY LIFE MEMBERSHIP

Jack Kreutzer

The Academy of Dentistry, on the occasion of the 1973 Winter Clinic, has seen fit to confer Honorary Membership to an outstanding dental practitioner and teacher.

Dr. Jack Kreutzer was born in Steinbach, Manitoba, receiving his early education there and in Winnipeg. He entered the Faculty of Dentistry, University of Toronto, in 1928 and graduated in 1932 with a D.D.S. degree and the following year a B.Sc.D. degree.

The forty years which have followed his graduation have been filled with accomplishment and unselfish interest in the advancement of dentistry as a profession. While conducting a private practice from graduation until 1963, he was involved in part-time teaching and clinical research at the Faculty of Dentistry, serving in the Departments of Dental Anatomy, Operative, Prosthetic, Preventive and Clinical Dentistry. He was a major contributor to the programme of the Dental Nurses Course when it was conducted at the Faculty. His involvement in the undergraduate programme in Ethics and Practice Management reflects his sincere concern for high standards of service and professionalism.

During World War II he served in the R.C.D.C., retiring in 1945 with the rank of Captain. He has served extensively in local, provincial and national dental societies in numerous capacities. In 1956 he was honoured by the American College of Dentists by membership in the College. He has lectured extensively throughout the country and is particularly well known through speaking engagements at most of the local Societies in Ontario. He was Chairman of the Department of Preventive Dentistry from 1960 to 1970. He is presently Director of Clinics at the Faculty of Dentistry and continues to play a major role in the conduct of Preventive Dentistry within the Faculty.

Dr. Kreutzer combines a congenial personality, an enquiring mind, administrative expertise, clinical excellence, understanding, tolerance and compassion into a composite of an outstanding professional. His influence on so many throughout his years of service to dentistry will be reflected in this recognition.

There will also be a presentation of "50 Year" Certificates

Part I

**Implants in Dentistry
"The Other Side"**

Part II

**Surgical Correction of
Occlusal Abnormalities**

**STANLEY J. BEHRMAN
D.M.D**

Curriculum vitae:

Following graduation from The School of Dentistry at The University of Pittsburgh, Dr. Behrman trained in oral surgery at The New York Hospital, Cornell Medical Center. He is the Attending Oral Surgeon-in-Charge at The New York Hospital and Associate Professor of Clinical Surgery at Cornell University Medical College. He is President of The New York Institute of Clinical Oral Pathology, Consultant Oral Surgeon at the Hospital for Joint Diseases and Medical Center, and a Fellow of The American Academy of Dentistry.

A brief synopsis of each presentation follows:

Part I—Implants in Dentistry: "The Other Side of the Story".

Not all dental implants are successful. What happens when they fail? What happens to the soft tissues, to the bone, to the patient? Are the results of failure trivial and insignificant or may they be near-catastrophic? Complications of failure of all types of dental implants will be shown. Why do implants fail? Is it because of the design of last year's model or is it that physiological and biomechanical principles are ignored? Let's find out.

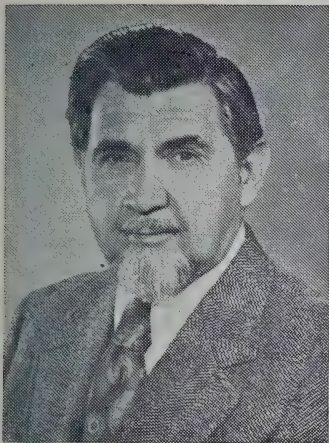

Part II—Surgical Correction of Occlusal Abnormalities:

Problems of malocclusion which are not receptive to orthodontic treatment because of age, time or patient preference, and those malocclusions which are secondary to skeletal malrelationships, all may be correctible by surgery in conjunction with other dental disciplines. This may well represent the acme of dental services — restoring proper mastication, deglutition and speech and abetting full-functioning in the socio-economic milieu.

Place: Confederation Room

Time: 9:30 — Chairman — Dr. Simon Weinberg

2:30 — Chairman — Dr. Paul Chapnick

**Electrosurgery in
General and
Restorative Dentistry
JOHN E. FLOCKEN
D.M.D.**

Dr. Flocken is Professor of Prosthodontics, UCLA School of Dentistry, and Director, Continuing Education in Dentistry, University Extension, UCLA; Member, American Academy of Electrosurgery. He is a diplomate of the American Board of Prosthodontics and a member of many Prosthodontic organizations and serves as a consultant in prosthodontics at six Federal Hospitals.

Synopsis

Electrosurgery is well established as an important adjunctive procedure in restorative dentistry. It is an instrument truly designed for the general practitioner. As diamond and carbide burs permit precise cutting of hard tissue, electrosurgery, with its assortment of electrode points permit precise carving, sculpturing or altering of soft tissue with complete control and with little or no hemorrhage. Research investigators substantiate the safety of this technique. Properly utilized, electronic electrosurgical cutting and coagulation currents permit painless, rapid healing without scar formation. Post-operative reactions are minimal. The many time saving features and increased efficiency of related procedures make this instrument a must for the general practitioner's armamentarium. Frequently electrosurgery is the only solution for removal of excess or trapped gingival tissue, or control of gingival tissues at cementation time.

Place: Territories Room

Time: 9:30 — Chairman — Dr. M. Chantler

2:30 — Chairman — Dr. F. H. Compton

A Common Sense Approach To Patient Management

BRUCE GLAZER, D.D.S., B.Sc.D.

Toronto

Synopsis:

This presentation will attempt to coordinate all the various forms of sedation available to the general practitioner. Special emphasis will be placed on the intra-muscular delivery system for mood altering drugs. By the use of slides, consideration will be given to basic technique, armamentarium, anatomy, pharmacology, and complications.

Biography:

Dr. Glazer graduated from the Faculty of Dentistry, University of Toronto in 1966, earned his B.Sc.D. in Anaesthesia in 1968 and his Fellowship in General Anaesthesia in 1970. He is Vice-President of the Ontario Dental Society of Anaesthesiology. Presently he is an Associate, Department of Anaesthesia, Faculty of Dentistry, University of Toronto and is in General Practice, with a special interest in anaesthesia.

Place: Room 3

Time: 10:45 — Chairman — Dr. C. S. Munro

3:45 — Chairman — Dr. W. R. Dover

The Relationship between Fixed Bridge Design and Periodontal Disease

PHILIP A. WATSON, D.D.S.

University of Toronto

This presentation will include a discussion of

- (a) pontic design for posterior and anterior units for the maxillary and mandibular arches
- (b) the position of gingival margins related to plaque retention and recurrent caries
- (c) the contour of castings and plaque retention
- (d) embrasure design and its relationship to oral hygiene, recurrent caries and periodontal disease
- (e) traumatic occlusion

Biography:

Dr. Watson graduated in dentistry from the University of Toronto in 1967. Following a year in general practice he entered graduate studies at Indiana University School of Dentistry. He is presently Assistant Professor in the Department of Restorative Dentistry at the University of Toronto and consultant in Crown and Bridge at the Department of Dentistry, Toronto Western Hospital.

Place: Alberta Room

Time: 10:45 — Chairman — Dr. M. G. Hardy

3:45 — Chairman — Dr. A. M. Adams

The Leonard Linkow Endosseous Blade Implant

J. S. DRUCK, D.D.S.

Toronto

Synopsis:

An illustrated discussion clinic, projecting in selected cases, the reasons for, and the technique of, employing the Linkow Blade in the broad field of restorative dentistry.

Discussion will include the use of the Linkow Blades as abutments in bi- or unilateral fixed bridge prosthesis, as supporting structures in edentulous spaces between periodontically involved teeth. Their use in the edentulous maxilla and mandible; and in the atypical situations involving anatomical structures, such as the nasal floor, the maxillary antrum, and the inferior dental nerve.

Diagnosis, treatment planning and surgical technique will be discussed.

Biography:

Dr. Joseph S. Druck graduated from University of Toronto in 1964. He is on part time clinical staff at the Faculty of Dentistry.

Dr. Druck was a featured guest clinician at the Premier Congress of Oral Implantology held in Paris, France, October, 1972. Dr. Druck has presented clinics to Canadian Dental Societies and seminars to many study groups.

Place: Quebec Room

Time: 10:45 — Chairman — Dr. A. D. Smith

3:45 — Chairman — Dr. P. Kowalchuk

"Vertical Condensation of Warmed Gutta Percha"

G. A. (KEN) PATERSON, D.D.S.

Mississauga

A rationale of treatment to simplify and improve your endodontic procedures with specific reference to the vertical condensation of warmed gutta percha into properly shaped root canals.

Dr. Paterson graduated from University of Toronto in 1950. He now practices general dentistry with special emphasis on endodontics in Mississauga. He serves on the dental staff of Mississauga Hospital.

Place: Algonquin Room

Time: 9:30 — Chairman — Dr. W. C. Stephens

2:30 — Chairman — Dr. G. E. Sparrow

The diagnosis and management of "lumps and bumps" in the oral cavity

D. MOCK, D.D.S.

University of Toronto

Synopsis:

Exophytic lesions are encountered quite commonly in the oral cavity. Differentiating the various lesions can be of considerable importance in determining management and significance to the patient. The clinical features, diagnostic criteria and management of various commonly encountered lesions will be illustrated and discussed.

Biography:

Dr. David Mock graduated in dentistry from University of Toronto in 1968. After an internship at the Toronto General and Toronto Western hospitals he entered general practice in Mississauga. In 1970, he was a clinical fellow in the Department of Pathology of the Toronto General Hospital and is now completing a Ph.D. in oral pathology and oral medicine at University of Toronto.

Place:

Time: 10:45 — Chairman — Dr. T. B. Van De Mark

3:45 — Chairman — Dr. V. Moncarz

Periodontics Where It Belongs: Integrated Into General Practice

B. J. ZULQAR-NAIN, B.D.S., M.S.
University of Western Ontario

Synopsis:

A short presentation designed to reacquaint the general practitioner of dentistry with the Physiology of the periodontium. The etiology, histopathology and diagnosis of periodontal diseases. Emphasis will be placed on rationale for treatment of periodontal disease, treatment planning and selection of an appropriate technique, stress being laid on the role of the general practitioner in Periodontal therapy.

Dr. Zulqar-nain graduated in 1961 from the University of the Punjab in Pakistan. Dr. Zulqar-nain was awarded the Fulbright Fellowship to come to the U.S.A. From 1963-65, he did post-graduate fellowship in Oral Medicine at Forsyth Dental Center and Harvard School of Dental Medicine. In 1965, he joined Eastman Dental Center for specialty training in Periodontics and enrolled at the University of Rochester for M.S., which he completed in 1968.

Since July, 1968, he has been associated with the Faculty of Dentistry at the University of Western Ontario and he became Associate Professor and Chairman of the Division of Periodontology in 1971, and also is on active staff of the University Hospital in London as a periodontist since March, 1973.

Place: Quebec Room

Time: 9:30 — Chairman — Dr. R. J. Sexton

2:30 — Chairman — Dr. A. N. Winnick

Types of Orthodontic Cases Suitable for interceptive and Limited Corrective Treatment

ROSS O. FISK, D.D.S., M.S., F.R.C.D.(C)
Toronto

It has always been difficult to select malocclusions which respond readily to interceptive and limited corrective orthodontic treatment. During this presentation a new objective method of rapid case selection and simplified system of treatment planning will be presented. Demonstration cases will be utilized to show appliances frequently used in general practice.

Biography:

Dr. Fisk completed his specialty program in Orthodontics in 1955 at the University of Michigan following his D.D.S. studies at the University of Toronto. Since then he has been associated with the Department of Orthodontics leading to his present status of Associate Professor as well as conducting a private practice in Toronto. He has a number of significant research projects to his credit and has been actively engaged in professional organizations both in Canada and abroad.

Place: Manitoba Room

Time: 9:30 — Chairman — Dr. Jim Kerr

3:45 — Chairman — Dr. W. J. Sinclair

Preventive Oral Surgery for the General Practitioner

HOWARD PHILLIPS, B.A., D.D.S., F.R.C.D.(C)

Toronto

The emphasis in modern dentistry is prevention. Oral Surgery is inherently a preventive and constructive specialty. This will be illustrated with surgical techniques the general practitioner can use to save teeth, such as root resections and retrograde amalgams, useful techniques for removing roots and the prevention and correction of poor denture retention by successful sulcus deepening techniques.

Biography:

Dr. Phillips obtained his D.D.S. from University of Toronto, 1964. His Oral Surgery training was at Boston University and Harlem Hospital, New York. He is chief of the Dental Departments of Branson Hospital and Providence Hospital and an attending Oral Surgeon at New Mount Sinai Hospital. He is a Diplomate of the American Board of Oral Surgery and author of many articles.

Place: Tudor Room

Time: 10:45 — Chairman — Dr. Morley Lem

3:45 — Chairman — Dr. Ray Mulrooney

Dental Pharmacotherapeutics

W. C. STURTRIDGE, D.D.S., M.D., Ph.D.

University of Toronto

The use of drugs in the management of certain clinical problems will be discussed. Particular emphasis will be placed on sedation, relief of pain and treatment of infection in routine and unusual cases.

Biography:

Dr. Sturtridge completed his D.D.S. program in 1954 and his M.D. studies in 1965 at the University of Toronto. He worked in the private practice of dentistry for 6 years and has been closely associated with the Faculty of Dentistry and the Department of Pharmacology at U to T most recently as Assistant Professor. Dr. Sturtridge also is an Associate in the Department of Medicine, a Staff Physician at Toronto General Hospital and is Assistant Professor, Dental Therapeutics, University of Toronto.

Place: Algonquin Room

Time: 10:45 — Chairman — Dr. Morley Lem

3:45 — Chairman — Dr. Peter Rockman

Advantages and Disadvantages of Utilizing Dental Auxiliaries with Expanded Duties in Private Practice

ROGER L. ELLIS, D.D.S., D.D.P.H., M.Sc.

University of Toronto

Many general practitioners in private practice question what the advantages and disadvantages would be if dental auxiliaries with expanded duties were available for their practices. The O.D.A. Demonstration Project was set up to supply information on the possible effect of utilizing dental auxiliaries with expanded duties in private practice on the dentist, the auxiliaries and the patients. Dr. Ellis, Chairman of the Project, will give an up-to-date report on the subjective findings of the participants as well as a preliminary indication of the objective results as to changes in productivity or patient flow.

Biography:

Dr. Ellis graduated from the University of Toronto with his D.D.S. in 1956. He received his D.D.P.H. in 1968 and M.Sc. in 1970. Presently he is Associate Professor of Community Dentistry, University of Toronto.

Place: Tudor Room

Time: 9:30 — Chairman — Dr. D. M. Wallace

2:30 — Chairman — Dr. Murray Wagman

“Management of the Terminal Dentition”

A. H. FENTON, D.D.S.

Toronto

Synopsis:

Dental research in the past two decades has produced more evidence of the problems presented to edentulous patients and the dentists who treat them. Rising standards of living and increasing longevity are creating an exponential demand for prosthodontic service. The onus is upon the dental profession to provide service that will minimize the future dental needs of patients. This clinic will demonstrate prosthodontic service to retain the natural dentition.

Biography:

Dr. Fenton was an honours D.D.S. graduate from the University of Toronto in 1967. Following internship and private practice he completed specialty training in Prosthodontics at the Eastman Dental Center in 1972. He is presently a research fellow of the University of Rochester and Assistant Professor of Prosthodontics at the University of Toronto. He is in private practice in Toronto and on the staff of the Toronto General Hospital.

Place: Room 3

Time: 9:30 — Chairman — Dr. Peter Markle

2:30 — Chairman — Dr. Francis Zarb

"Long Cone Paralleling Radiographic Technique — The Modern Way — Fight or Switch"

R. BARLOW, D.D.S.

Hamilton

F. G. KELLAM, D.D.S.

University of Toronto

The inaccuracies inherent in the short cone bisecting angle technique have long been recognized. An alternative procedure, using the long cone or right angle technique, results in superior definition and elimination of anatomical interference in the radiograph. The underlying principles and an up-to-date technique of application will be demonstrated.

Dr. Kellam is a graduate of the University of Toronto in 1943. Following service in the R.C.D.C. and a number of years in general practice, he joined the staff of the Dental Faculty at University of Toronto in 1962 and is at present associate professor in the Department of Radiology. He is in charge of the Radiography program at George Brown Community College and is a member of the staff of the Dental Department, Toronto General Hospital.

Dr. Barlow graduated from the University of Toronto in 1965. He interned at the Hospital for Sick Children for one year and, following that, entered general practice in Hamilton, Ont. He is presently on staff as part-time demonstrator in the Radiology Department at the University of Toronto.

Place: British Columbia Room

Time: 9:30 — Chairman — Dr. R. D. Beveridge

2:30 — Chairman — Dr. John F. Pepper

A Practical Approach to the Surgical Removal of Impacted Third Molars for the General Practitioner

LAWRENCE GAUM, D.D.S.

Toronto

Synopsis:

This is not a presentation to show how an oral surgeon removes impacted third molars. It is a presentation geared for the general dentist who performs a large portion of his own surgery, through desire or necessity.

An attempt has been made here to illustrate with the aid of slides, a step by step approach that the dentist should use in removing impacted third molars. Suggestions and techniques are presented which it is hoped will be beneficial clinically in the dentist's practice.

Biography:

Dr. Gaum received his D.D.S. from Dalhousie University in 1961, and after four years in general dentistry, he trained in general anaesthesia and oral surgery at the University of Pittsburgh and Wilmington, 1965-68. He is a member of the teaching staff at the University of Toronto and has published several articles and lectured on oral surgery and anaesthesia. He is a Fellow of the American Dental Society of Anaesthesiology.

Place: Alberta Room

Time: 9:30 — Chairman — Dr. G. Pitkin

2:30 — Chairman — Dr. G. D. Atkins
